

Wi-Fi Garage door controller

Gogogate2 is a smart Wi-Fi device used to remotely operate and monitor your garage door from a Smartphone, Tablet, PC or Apple Watch. The system will send you real time alerts when door is open, closed or left open. You can also integrate video and manage the access of your guests. With the use of iFTTT and Amazon Echo, you can automatically open or close your garage door via GPS or via voice commands. You can set a time for door to automatically open or close too.

COMPATIBLE WITH
INDOOR CAM
